DETAILED ACTION

The examiner acknowledges the submission of the amendment filed on 09/11/02. At this time claim 8 has been amended, claims 14-20 are newly added claims. Thus, claims 1-20 are pending in the instant application.

Information Disclosure Statement

1. The information disclosure statement filed 09/16/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The submission of the optical disk with pertinent publication is unacceptable, but Examiner has considered references listed at this time and the optical disk has been placed in the application file.
2. Winotek's internet site www.winotek.com listed in 1449 has not been considered because there is no publication date and there is no affidavit stating that the reference is a Prior Art dated before the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2835

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 2, 5, 6, 13, 14, 17, 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang.

Chang discloses a device for removably mounting a hard disk drive in a memory storage housing comprising a carrier 50 for holding a hard disk, the carrier having rails to be slidably mounted in the memory storage device 30, a face plate 70, a fan 77 and a handle mounted on the face plate, a heat sink 60 slidably mounted on the carrier 50.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 4, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang in view of Lin, 036.

Art Unit: 2835

Chang discloses the claimed invention except a filter being mounted on the face plate.

Lin discloses the removable filter mounted on the face plate to filter air. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to have filter as disclosed by Lin in the structure disclosed by Chang to provide clean cooling air into the housing.

7. Claims 7, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang in view of Wyler or, as an alternative, in view of Ende.

Chang discloses the claimed invention, as shown above including grid on the carrier⁵⁷ and on the heat sink 62 but does not show fins. Wyler discloses the carrier for the hard disk drive including fins 42. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include fins mounted on the carrier and the heat sink and being aligned with respect to the fan as disclosed by Wyler or Ende in the structure disclosed by Chang for efficient heat dissipation.

8. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang in view of Wyler and further in view of Lin ,036.

Chang discloses the claimed invention, as applied to claims 7 and 8, except the face plate and the filter. Lin discloses the removable filter mounted on the face plate to filter air. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to have filter as disclosed by Lin in the structure disclosed by Chang to provide clean cooling air into the housing.
